

Standing together to advance the fight against hematological disorders

In December we take the fight against hematological disorders to a double level: our exclusive webinar featuring Dr. Mohammad Hussaini of the Moffitt Cancer Center will take place on December 2nd and will discuss the development of a comprehensive solution that better identifies myeloid malignancies. The discussion will continue in Orlando at the 61st edition of the American Society of Hematology annual meeting 7-10 December; meet our experts at booth #1469.

Getting to the heart of inherited cardiac diseases

Spotlight on the SOPHiA Cardio Solutions

The SOPHiA Cardio Solutions are expertly designed to target up to 128 genes associated with the most prevalent inherited arrhythmias and cardiomyopathies. Offering a streamlined and standardized workflow, these solutions can be easily implemented by any healthcare institution.

SOPHiA GENETICS welcomes Milton Silva-Craig to its Board of Directors

"We are thrilled to have Milton join SOPHiA's journey in such an exciting stage in the company's evolution. Given his success in growing and scaling health companies rapidly and his experience in data-driven systems, Milton's guidance will be essential in capturing and leveraging multi-modality new-generation data and improving health outcomes and economics worldwide," says Jurgi Camblong, CEO and co-founder of SOPHiA GENETICS.

CASE STUDY

SOPHiA user-friendly platform reduces overall turnaround time

Fundación Perez Scremini is a Uruguayan foundation that offers childhood cancer diagnoses and treatment in the region. They chose to work with SOPHiA GENETICS to analyze data obtained from Next-Generation Sequencing in a reliable, accurate and fast way.

"We have recently started using SOPHiA™ through its user-friendly platform and we are already very happy to count on it. In a few hours we have our data accurately analyzed and safely stored. We appreciate the continuous updates and the very fluid communication with SOPHiA GENETICS' employees, always ready to solve any inconvenience or provide any advice. Moreover, being part of SOPHiA's community allows us to share knowledge with a growing number of experts that helps us to better diagnose our patients. In summary, our experience to date with SOPHiA GENETICS has been excellent."

- Lucia D'Andrea Hirschy, Ph.D., Head of Molecular Biology Laboratory at Fundacion Perez Scremini
