We warmly welcome Troy Cox to the SOPHiA GENETICS team

"I am proud to serve on the Board of such an innovative company, uniquely positioned to leverage the benefits of Data-Driven Medicine to make a difference in patients' lives worldwide. This spirit drove me my entire career, and I'm happy to be able to pursue this mission in a truly inclusive and sustainable manner with SOPHiA GENETICS," said Troy Cox

Don't miss our next workshop

We will be in Orange County on Friday, August 16th for an exclusive workshop in partnership with Children's Hospital of Orange County Medical Intelligence and Innovation Institute and AiMed. Join us for an in-depth conversation with the crews from CHOC and LA Children's Hospitals on combining AI technology and Next Generation Sequencing to reduce the diagnostic odyssey and the burden faced by children and families confronted to rare diseases.

Great talk and interactions at ESHG

This year's edition of the European Society of Human Genetics Congress took place in the beautiful city of Gothenburg, Sweden. As a major event in the field, ESHG is a wonderful opportunity for the SOPHiA team to demonstrate its teamwork and stimulate both knowledge and network. Our experts could share their experience at the occasion of a corporate satellite symposium and get some insights on the latest developments in the fight against rare diseases during the successful networking event that followed.

CASE STUDY

SOPHiA helps clinicians reduce turnaround time while maintaining accurate results

The Paoli-Calmettes Institute (IPC) in Marseille treats around 10% of cancer patients in France. They use SOPHiA to accurately analyze genomic variants associated with breast and ovarian cancers. More importantly, thanks to SOPHiA, the Institute was granted with the ISO 15189 accreditation for its Next Generation Sequencing laboratory from the French Accreditation Committee (COFRAC).

"SOPHiA's strength is its ability to have a lab up and running, providing cutting edge genetic analysis in less than a week, instead of months. In addition, SOPHiA values customers' insights and is always trying to implement ideas from the hospital staff to constantly improve its system."

- Professor Hagay Sobol, Head of the Oncology Genetics, Prevention and Screening Department at the IPC

EMPLOYEE MOTIVATION

Opening the door to a new era of breast cancer prevention

"What keeps me motivated is my past experience working in an academic study on the metastatic phase of breast cancer. As part of that study, I would get an email every time a new patient would come in. With every new email, it meant another woman had just been diagnosed with metastatic breast cancer. During the first year of the study, I had emails coming on Christmas Eve. These women were being told they had a 4 in 5 chance they wouldn't be around after four more Christmases..."

- David Cox
