

## The new-generation SOPHiA DDM™ Platform is now live!

The revamped SOPHiA DDM™ interface, new features, and cutting-edge capabilities are set to further accelerate precision medicine workflows, bringing us another step closer to democratizing data-driven medicine.

### New Interface

Improved capabilities and new interface to ease onboarding and reduce turnaround time

### Web Access

Simplifying installation and updates

### New Features and Applications

Including:

- Point-based ACMG classification
- ClinGen/CGC/VICC Oncogenicity pre-classification
- Selectable transcripts
- VCF processing
- WGS\*

### Unique workspace

One workspace to host all IVD and RUO Applications and Features

### Single Platform

Access our Genomics, Radiomics, and Multimodal analytical modules

### Revamped Architecture

Boosting performance and accelerating new feature implementation

### Data Protection

No changes to data management and security - HIPAA and GDPR compliant, ISO/IEC 27001, 27017 & 27018 certifications, IVDR certified\*\*

### Advanced analytical performance as standard

Detect challenging variants with high confidence using proprietary AI/machine learning algorithms, which excel at calling complex and diverse variant types

\*\* SOPHiA DDM™ is CE marked under IVDR Supporting patient diagnostics in the EU and other regions when in **Dx Mode**
